The right-of-way in contest is about seventy miles long and extends southwesterly from the Utah-Nevada State line. About ten years ago the Oregon Short Line obtained a right-of-way over this ground, and at a cost of something over \$500,000 constructed a grade for the distance of saventy miles, which included six tunnels. The conditions at that time did not justify prosecuting the project further, and it is only recently that interest has been resumed in

Anatural food California Prune

The prune does not have to be cooked. The curing process has made it palatable and di-gestible. The prune of the California Cured Fruit Association, as you buy it, can go just as it is into the hunter's bag, the child's lunch basket, the workingman's dinner pail, the soldier's knapsack. In no food of the same weight can you get anything with as much nutritive value

as the prune. Eaten without cooking it as the prune. Eaten without cooking it appeases hunger, quenches thirst, gives strength and is as delightful to the palate as any confection. The reason that few people know of this, and some will not believe it without a trial, is because the public has in mind the old boarding-house prune that was a by-word and a joke. A fair chance to prove the reformation is all we ask for the present-day Galifornia prune. The proof that you

are getting the right prune is the brand of the **Galifornia Gured Fruit** Association as displayed below, and now placed on all Association goods.
